Elected and Appointed Officers

- President Lorrie Olson
- 1st Vice President MJ Dodson
- 2nd Vice President Joy Connelly
- Secretary Susan Knodell
- Treasurer Peggy Gray
- Parliamentarian Open
- Chaplain Betty Mayne
- Historian Anita Trone
- Past President Carol Franich

Message from the President

Happy New Year to you all! I hope you were able to enjoy time with family and friends over the holidays. I always look forward to a little down time where I can reflect on what has transpired over the past year, then hope and plan for the next one to come. I am still waiting for that down time.

I am very pleased to announce the FRW 2019 Executive Committee:

- President Lorrie Olson
- 1st Vice President MJ Dodson
- 2nd Vice President Joy Connelly
- Secretary Susan Knodell
- Treasurer Peggy Gray

MJ and Joy are serving their second year as 1st and 2nd VP's and Peggy moved from Secretary to Treasurer. Susan is new to the FRW and the Executive Committee. Welcome Susan and thank you for your commitment towards the success of the FRW.

Our annual Christmas/Installation party was an amazing event — from the table linens and decorations, to the catered holiday meal and the awesome raffle prizes. Congratulations to Pam Duckering, who won the Trumpy Bear door prize. I expect next year we will kick it up another notch! My sincere thanks to all the ladies of the FRW who made it such a special evening.

Membership forms and payments are rolling in. If you have already renewed, thank you so much for your continued support. If you keep meaning to write that check out, please do as soon as possible. We are working hard to re-

tain current members, while we try to attract new ones. The NvFRW has established membership goals that we try extremely hard to meet. We did it in 2018 and I expect we will again in 2019.

Our newly elected and re-elected Republican officials were just sworn in to serve their posts. It was a very disappointing result, but we still have a few out there that need our continued support. With 2019 being a legislative year, we can expect to see bills that will negatively impact our conservative values as well as our constitutional rights, particularly in regard to bearing arms.

So, this is not a down year. In fact, we need to organize and work as hard as ever to protect our rights and to get more Republicans voted into office in 2020.

Thank you for your continued support.

Lorrie Olson
President

Wreaths Across America

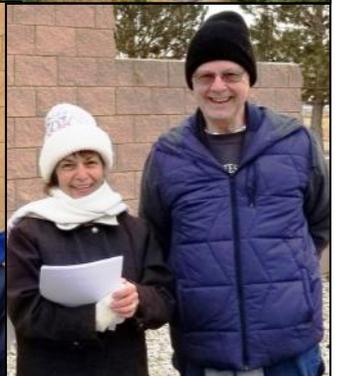

Once again, on December 15, 2018, appreciative Americans placed wreaths on graves at veterans cemeteries all across America. Each ceremony was timed to coincide with the laying of wreaths at Arlington Cemetery in Washington D. C. The Fernley Republican Women participated by welcoming attendees, providing snacks and laying wreaths. Almost 2,500 people braved the frigid weather to attend the ceremony at the Northern Nevada Veterans Memorial Cemetery (NNVMC) in Fernley. The FRW and the Nevada Federation of Republican Women joined the community and succeeded in purchasing enough wreaths to place one on each grave site at NNVMC in Fernley - almost 9,000.

FRW Christmas/Installation Party December 18, 2018

The Fernley Republican Women held their annual Christmas/Installation Dinner on December 18th at the Golf Club at Fernley. The Honorable Judge Leon Aberasturi administered the Oath of Office to the incoming officers. The officers for 2019 are Lorrie Olson, President; MJ Dodson, 1st Vice President; Joy Connelly, 2nd Vice President; Susan Knodell, Secretary; and Peggy Gray, Treasurer. Approximately 60 guests were on hand to congratulate the new officers. There was only one new officer, Susan Knodell, this year and her biography is on page 7.

Newly installed officers: Treasurer Peggy Gray, Secretary Susan Knodell, 2nd VP Joy Connelly, 1st VP M J Dodson, President Lorrie Olson & Judge Leon Aberasturi, who installed our 2019 Officers.

Chef Ryan Brunton

Susan Knodell, Secretary

I was born and raised in Petoskey, Michigan. I have one younger sister. Growing up in northern Michigan gave me an appreciation of the outdoors. I spent summers exploring our rural area on horseback.

After graduating from high school, I attended Central Michigan University for my Bachelor's degree. My decision to pursue a career in Audiology was strongly influenced by my parents, both of whom have severe to profound hearing losses. In 1995, I earned a Master's degree from Wayne State University's School of Medicine. After working as the sole Audiologist for three different hospitals, I accepted an opportunity to work for Detroit Public Schools.

In 1997, the Detroit Redwings won the Stanley Cup after a 40 year drought. It was during the victory parade that I met my husband, Mark. We were married in 1998 and still today are die hard hockey fans. Over the past 20 years we have lived in four states following Mark's career opportunities. Along the way we have welcomed the birth of our two sons, Jack and Peter. In 2013, we moved to Fernley.

It has been wonderful moving back to a small town to raise our boys. I enjoy golf, Cowboy Fast Draw, and continue my passion for horses with mounted shooting. Our boys keep me equally busy with their school and sport schedules.

As a new member of the Fernley Republican Women, I am honored and excited to serve as secretary in 2019.

POST-ELECTION MESSAGE FROM THE NVFRW PRESIDENT

November 8, 2018

Hello, my fellow Republican Women,

Where do I begin? I think for all of us the shock of Tuesday night's returns will take a few days to wear off - if it ever does - as we all absorb the awful landscape of friends and promising candidates and sterling and proven ELECTEDS who were just plowed under. I'm having the same conversations that I know you are - how could it have happened to our best and brightest? How do we continue? What can we accomplish? Where do we begin?

I just want to say to all of you that I KNOW what you have been doing for months and months - the checks you have written, the days away from family walking and talking to complete strangers, the endless fundraisers that you have attended when you had no more cash to give but just wanted to show up and show your support, the phone calling that seemed futile but you were persuaded that it could be effective. Everyone saw us Republican Women working EVERYWHERE!

And you need to know how proud I am to be the

President of such an organization of dedicated, informed women. I keep learning so much from so many of you and I am grateful and proud to be a leader among leaders. We can be sick and sorry for the tragic outcome, but we know we did every single thing we could possibly have done for the good and just cause of Republican ideals and principles. I believe that we all saw unfortunate decisions being made by some campaigns that we wanted to advise against, but we kept silent. So much was completely out of our control, but we gave the very best we had for so many months in so many ways. And for that we should be proud and satisfied.

We will all need some time to mourn the meaning of these very real losses and find a way to strategize a comeback with solutions. We will keep working and talking together and not give up.

I am glad to be in this with you, my friends.

Sincerely,
Diane Baranowski
President Nevada Federation of Republican Women

Fernley Republican Women is a group of women (and men as associate members) who share similar conservative values and ideals, and who are dedicated to increasing the influence and effectiveness of women in the cause of good government through political education and active political participation.

OPINION

ENOUGH WITH BASHING CARBON DIOXIDE, THE GOOD GAS

by Carl Fishel

The recent months have brought articles from many people who seem to know little about CO₂ other than what Al Gore and environmentalists on some governmental payroll have to say about it. One could have some knowledge about CO₂ had they taken biology in high school, if it's even taught in Nevada anymore. Oh that CO₂ — sustenance to the entire plant kingdom, foundation of the world food chain, basis of all life on Earth — is *poison*. Even a tiny increment — the little bit that we produce by burning 'fossil fuels' (nature produces 33 times more) — is quite enough to give the planet a *fever*. Civilization — survival even — is on the line. Catastrophe looms. Emergency worldwide reforms are imperative. Yes, they, the United Nations and environmentalists, will impoverish millions to limit CO₂, but it must be done. This is the catastrophic, 'anthropogenic' global warming (CAGW) hypothesis. The CAGW insists it's settled science, however, there is no science about it. Therefore it is not settled. Why would anyone want to destroy the very sustenance the entire plant life on earth? Where are you "plant based" dieters going to get your food? Where are any of us going to get food, since all animal life consumes plant life? Plants also provide us with our oxygen.

A few other basic biology facts: The atmosphere consists of approximate 78% nitrogen, the major source of fertilizer; and 20.9% oxygen. That leaves 1.1% of the atmosphere to argon and CO₂. Maybe we should demonize argon. After all, there is more of it than CO₂ and its known use is neon lights, welding and window insulation.

A few facts about Albert Gore Sr. and Albert Gore Jr.: Albert Gore Sr. was a farmer about 40 miles east of Nashville, Tennessee, where he met Armand Hammer. They became business partners. Hammer founded and headed Occidental Petroleum, the 3rd largest energy company in the world. Gore Sr. then became a United States Senator and sat on the board of Occidental Petroleum. Gore Sr. lost his Senate seat in 1972 and was appointed the head of Island Creek Coal Co. by Hammer. Gore Jr. grew up in a lavish lifestyle, supported by dirty carbon. He studied journalism in collage, not science. Gore Jr. was heavily criticized by environmentalists for his stock holdings in Occidental, which he then sold. He did not donate it; he bought a larger wallet to hold the cash. What's the difference environmentalists?

Scientists, during the nineties bored deep into the Arctic ice and obtained data by studying bubbles in the Antarctic ice cores — 650,000 years of fluctuating CO₂ concentrations and atmospheric temperatures. By examining the ice core dating back over thousands of years, they found that at every glacial termination, temperature rises first, and then — with an average lag of 800 years — a rise the CO₂ concentrations.

This is known as the CO₂ lag. All of the scientific studies that have examined the Antarctic ice-cores concur. Here is a sampling:

Fischer, H., Wahlen, M., Smith, J., Mastroianni, D., & Deck, B. (1999). Ice Core Records of Atmospheric CO₂ Around the Last Three Glacial Terminations. *Science*, 283, 1712 – 1714.

Mudelsee, M. (2001). The phase relations among atmospheric CO₂ content, temperature and global ice volume over the past 420 ka. *Quaternary Science Reviews*, 20, 583-589.

Caillon, N., Severinghaus, J., Jouzel, P., Barnola, J.-M., Kang, J., & Lipenkov, V. Y. (2003). Timing of atmospheric CO₂ and Antarctic temperature changes across Termination III. *Science*, 299, 1728-1731.

Siegenthaler U. et al. (2005). Stable Carbon Cycle–Climate Relationship During the Late Pleistocene. *Science*, 310(5752), 1313-1317.

The United Nations approved, Intergovernmental Panel on Climate Change (IPCC) advised, Nobel-laureate, *Oscar-winning* movie presented the key piece of evidence backwards. The Antarctic ice-core record contains exactly zero evidence to support that CO₂ matters to major temperature changes. This key evidence supports, in fact, the opposite claim: that CO₂ concentrations are a *consequence*—not a cause—of temperature changes.

Confronted with real science, Gore smirks and says "Most ridiculous thing I ever heard." His audience laughs. We, the science believers, are called "deniers" and demonized.

Carl Fishel is a Sparks resident.

Editors note: Thanks to Carl Fishel for allowing us to reprint his article and Antonio Branco for allowing us to use his cartoon at no charge. See more of Mr. Branco's work at <http://www.ComicallyIncorrect.com>.

OPINION

Key Facts on Nevada's Spending Problems

by Ron Knecht

This is the first of a series of columns summarizing my Controller's Annual Report (CAR) for fiscal year 2018 (FY18). Based on the state's official books and records, the CAR provides Nevada citizens, officials and others a summary of key facts, data, analysis and issues addressing Nevada's fiscal condition

and policy challenges.

Here's the bottom line: Over the last dozen years, state spending has grown faster than Nevada's economy, thus imposing an ever larger real burden on Nevada families and businesses, whose real incomes declined over that time.

Rapid increases in spending on health and social services (HSS) and K-12 education are driving state spending growth. HSS and education (K12 and higher) grew to comprise 79 percent of total state spending of \$12.827 billion in FY18, while all other state spending in total declined significantly in real terms.

In FY18, HSS consumed \$5.844 billion (46 percent of total state spending), with K-12 education taking \$2.344 billion (18 percent) and higher education adding \$1.911 billion (15 percent). Their growth totaled \$5.360 billion, or 93 percent of the growth of \$5.761 billion in total state spending.

All other activities – law enforcement, justice, public safety, transportation, unemployment insurance, general government, regulation, resources, etc. – spent \$2.729 billion, or 21 percent of the total. While this total increased 17 percent in nominal dollars, the real per-person spending fell by 25 percent.

With population growing 22 percent since 2006 and inflation of 28 percent, real per-person HSS spending grew 70 percent and real per-student state K-12 outlays rose 24 percent. Real per person transportation spending increased seven percent and real higher education outlays fell six percent. As a result, HSS and K-12 by themselves accounted for 82 percent, or the lion's share of the increases. Remaining spending on a wide range of government functions fell 34 percent in real per person terms.

In contrast to the 70 percent and 24 percent growth rates on HSS and K-12, the real per person incomes of Nevada families and business (personal income) fell six percent and the Nevada economy (gross state product) dropped 15 percent.

Because state spending grew while incomes shrank, the burden on Nevadans skyrocketed 81 percent for HSS, 29 percent for K-12 and 24 percent for total state spending. It was constant for higher education and it fell 20 percent for all remaining spending, including transportation.

This is quite contrary to the popular myths and narratives one hears from advocates and special interests related to HSS and K-12. They moan endlessly about budget cuts, which means their wish list requests were prudently trimmed back by the budgeting process. Or they trumpet ridiculous hyperbole, such as the claim a few years ago of a Reno Assemblyman that on his watch he witnessed the systematic destruction of K-12. At the time, K-12 spending had grown faster than even HSS.

Advocates and special interests spewing out such claims either have no idea of the facts or cynically don't care and just blather such false narratives hoping to advance their cause at the expense of the public interest. Next time you hear their claims, ask them to be specific and to document them. They can't.

Some other key facts on state spending I will address in critical detail in future columns include the following:

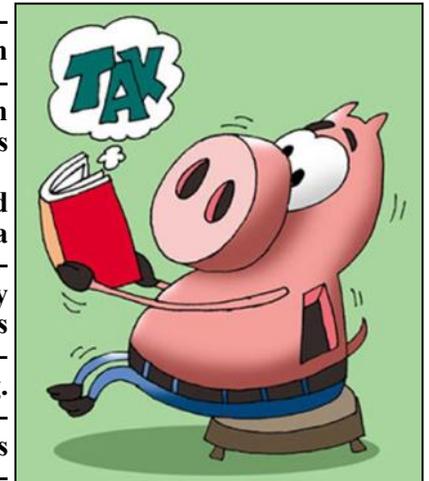

The single largest item in state spending is Medicaid, which sucked up \$3.772 billion due to Nevada's embrace of Obamacare provisions a few years ago. That's 64.5 percent of total HSS outlays.

The second largest item is state contributions to county school districts via the Distributive School Account, which reached \$1.618 billion in FY18. That's 69 percent of state K-12 funds.

Large increases in higher education tuition, fees, grants, contracts and "self-supporting" operations (meal plans, housing, ticket sales, etc.) offset decreases in spending from the state general fund.

There are no meaningful trends in transportation spending, which is mainly episodic capital investment. Nor in unemployment insurance, which is driven by economic trends and federal policy.

The tax-and-spend folks claim Nevada has a revenue problem, because they want to increase taxes to continue aggressively raising spending. They are fundamentally wrong: Revenues and sound public policy should govern (limit) spending; spending should not drive up revenues.

Ron Knecht has served as Nevada Controller, a higher education regent, a legislator and an economist. He can be reached at RonKnecht@aol.com.

Editors note: Thanks to Ron Knecht for allowing us to reprint his article
